Maintenance Instructions ClimaRad Sensa Vertical 2015

Maintenance frequency for filters
When should you replace the filters?

• With normal use, every 2 years or earlier if the message 'Filter vervuild' appears on the display (for example in homes and offices).

• In the case of intensive use, after 1 year or earlier if the message 'Filter vervuild' appears on the display (e.g. for care homes and schools).

Replacing air supply filters

1. Switch off the device first by removing the plug from the socket.

2. Remove the cover of the Sensa by lifting it upwards.

3. Open the three clips at the left-hand side of the unit and tilt the filter housing forwards.

4. Push the two dirty air supply filters through the top and the bottom out of the filter housing.

5. Push the new filters through the top and the bottom fully into the filter housing.

6. Tilt the filter housing back and secure with the three clips.

7. Put the cover back on.

and

press for 6 seconds

8. Push the plug back into the socket and reset the filter hour counter by simultaneously pressing on the + and - on the display for 6 seconds. The message 'Filter vervuild' will disappear.
Important: Reset the filter hour counter only if you have replaced the filters.

Caution: Make sure the filters do not protrude from the filter housing or that tools are trapped between the filter housing and the radiator housing. This can damage the filter housing and cause air leaks along the edges.
